

- (d) The Class III-A price for the preceding month;
- (e) The skim milk price for the preceding month;
- (f) The butterfat price for the preceding month;
- (g) The protein price for the preceding month;
- (h) The other solids price for the preceding month;
- (i) The somatic cell adjustment rate for the preceding month; and
- (j) The butterfat differential for the preceding month.

[60 FR 57162, Nov. 14, 1995]

§ 1079.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

PRODUCER PRICE DIFFERENTIAL

§ 1079.60 Handler's value of milk.

For the purpose of computing a handler's obligation for milk the market administrator shall determine for each month the value of milk of each handler described in § 1079.9(a) with respect to each of its pool plants, and each handler described in § 1079.9 (b) and (c).

(a) The handler's obligation for producer milk and milk received from a handler described in § 1079.9(c) shall be computed as follows:

- (1) Multiply the total hundredweight of milk in Class I as determined pursuant to § 1079.43(a) and § 1079.44(c) by the Class I differential price for the month;
- (2) Add an amount obtained by multiplying the total hundredweight of milk in Class II as determined pursuant to § 1079.43(a) and § 1079.44(c) by the Class II differential price for the month;
- (3) Add an amount obtained by multiplying the hundredweight of skim milk in Class I as determined pursuant to § 1079.43(a) and § 1079.44(a) by the skim milk price;
- (4) Add an amount obtained by multiplying the pounds of skim milk in Class II and Class III as determined

pursuant to § 1079.43(a) and § 1079.44(a) by the average protein content of the skim milk received by the handler, and multiplying the resulting pounds of protein by the protein price;

(5) Add an amount obtained by multiplying the pounds of skim milk in Class II and Class III as determined pursuant to § 1079.43(a) and § 1079.44(a) by the average other solids content of the skim milk received by the handler, and multiplying the resulting pounds of other solids by the other solids price;

(6) Add an adjustment for somatic cell content determined by multiplying the value reported pursuant to § 1079.30(a)(1) by the percentage of the total producer milk assigned to Class II and Class III pursuant to §§ 1079.43(a) and 1079.44(c); and

(7) Add an amount obtained by multiplying the total hundredweight of producer milk eligible to be priced as Class III-A by the Class III-A differential price for the month;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1079.44(a)(14) and the corresponding step of § 1079.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1079.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1079.44(a)(9) and the corresponding step of § 1079.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat assigned to Class I pursuant to § 1079.43(d) and the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1079.44(a)(7)(i) through (iv) and the corresponding step of § 1079.44(b), excluding receipts of bulk fluid cream products from an other order plant and
